

Ayurveda, which literally means the science of life (Ayur = Life, Veda = Science), ayurveda is an ancient medical science which was developed in India thousands of years ago. Believed to have been passed on to humans from the Gods themselves, Ayurveda developed and evolved into what it is today from several ancient treatises, most notably Adharva Veda which dates back to five thousand years. The ancient Vedic literature by sages has clearly laid out instructions to maintain health as well as fighting illness through therapies, massages, herbal medicines, diet control and exercise.
